### The Programme Guidelines

The document provides clear outlines for the face-to-face and on-line learning programmes on food authentication and on new testing techniques, respectively.

The structure, tone, delivery methods and proposed learning objectives and content for the programmes are outlined.

### The face-to-face learning programme

The course purpose is to give an in-depth understanding of the key current and emerging testing techniques available to address the specific issue of food authentication.

The open-access, educational material comprises text documents and presentations about 14 subjects.

### On-line learning programmes

The course purpose is to provide an overview and introduction to relevant, current and emerging testing techniques available for the food and drink industry.

The course in Moodle gives access to text documents and presentations about 12 technologies grouped into 3 modules (on food authentication, quality and safety).
